# SIDE BAR

- Sidebar allows offline appointment booking for patients who prefer traditional methods, ensuring accessibility for all individuals.
- Provides a convenient option to view online appointments, enabling easy access to scheduled appointments for both patients and staff.
- Offers a comprehensive view of all appointments, facilitating efficient management and coordination of patient visits.
- Enables administrators to add new patients to the system seamlessly, ensuring accurate record-keeping and streamlined processes.
- Provides a convenient feature to view all patient profiles, facilitating easy access to patient information as needed.
- Allows administrators to add new doctors to the system, ensuring adequate staffing and efficient healthcare delivery.
- Offers a comprehensive view of all doctors within the system, aiding in resource allocation and management.
- Facilitates the creation and management of digital prescriptions, enhancing efficiency and accuracy in healthcare provision.
- Enables the generation and management of invoices, ensuring seamless billing and financial management processes.
- Provides a platform for managing medicines, including inventory management and prescription fulfillment, enhancing the efficiency of healthcare delivery.
- Receptionist records payments received from patients in the system, updating financial records accurately for seamless documentation.
- Additionally, the receptionist provides a payment receipt to the patient, ensuring transparency and acknowledgment of the transaction.

# PRESCRIPTION PAD

- The digital prescription pad provides doctors with a user-friendly interface to create accurate prescriptions for patients.
- The pad automatically populates patient details like Name, Age, BP, and weight.
- Doctors can then input symptoms, tests, and advice for the patient.
- For medicine, doctors select from dropdown menus, specifying dosage, frequency, and duration of each medication.
- After writing the prescription, doctors can print the prescription pad directly from the digital interface. This feature ensures that patients receive a physical copy of their prescription for their records and future reference.
- This detailed process ensures accurate and tailored prescriptions for each patient's needs.
